

Installation

Trays are nailed or stapled to rafters, ensuring the correct positioning to provide a ventilation channel above insulation. Direction arrow on the tray should be pointing down towards the eaves. In open rafter situations, trays should be fitted 30-35mm clear of the front of the brickwork to ensure adequate ventilation. Full instructions are provided with each pack.

Rafter Tray is a simple-to-install, combined insulation interrupter and roof space ventilator with integral insect screen.

Product features & benefits

- Quick and easy to install
- Lightweight and durable
- Prevents entry of birds and large insects

Area of application

Suitable for:

- Closed and open rafters
- New build and re-roofing applications
- 450mm and 600mm rafter centres
- Roof pitches over 15°

Material

Black high-impact styrene

Dimensions

450mm Rafter Trays (450mm centres) – 430mm wide x 450mm long x 18mm deep

600mm Rafter Trays (600mm centres) – 430mm wide x 620mm long x 18mm deep

Weight (per carton)

450mm	11kg
600mm	15kg

Product Codes

Each pack –	
sufficient for 4.5 metres at 450mm rafter centres	KP964800
Each pack –	
sufficient for 6 metres at 600mm rafter centres	KP964900

Packaging

10 trays per pack, 10 packs per carton (100 off)

Related products

- Fascia Vents
- Soffit vents

Regulations

- Complies fully with all relevant British Standards

PERFORMANCE / TECHNICAL DATA

Ensures a clear ventilation channel above insulation and provides the equivalent of a continuous 10 mm opening when installed along the whole length of eaves (10,000mm² per metre run).
