

Adhesive Applicator Guns

InStar offers two applicator guns in the UK market, both are high quality and are designed for multiple use with INSTA-STIK 750ml Handy size.

The Product

Quality

All PU foam applicator guns are strictly quality controlled and each gun is checked prior to being issued for sale. Production is certified according to EN ISO 9001.

Design

The designs are carefully considered to ensure ease of use and comfortable handling by the user. The angled basket on the IS 780P (long barrellled) gun ensures that the canister remains vertical at all times. Thus ensuring maximum yield and minimum wastage.

Packaging

One applicator gun per box, user instructions and plastic tube extension where included (short guns).

Care & Maintenance

InStar applicator guns should be maintained and cared for in line with instructions, including periodically flushing with gun cleaner, to ensure maximum lifespan.

Customisation

There exists the possibility to customise guns to customers request for example:

- Handgrip in personalised colour
- Logo on the gun made by mould, by laser or plastic personalised labels
- Personalised box: printing in up to four colours
- Personalised instruction leaflet

- New design seal gland in P.T.F.E with adjustable shape

PU Foam Gun I.S 780P

A Professional gun designed for the application Dow INSTA-STIK 750ml Roofing Adhesive and foaming adhesives packaged in pressurised cans with threaded ring nut. The gun enables the user to adjust the product flow thereby reducing waste and ensuring accurate dispensing. This gun is equipped with an extra long barrel to facilitate stand up application of INSTA-STIK roofing adhesive and the application of other foam adhesives and expanding foams in hard to reach areas.. The gun is hermetically sealed, which prevents hardening of the product in the gun during normal use and lay ups. Both the basket and the gun are coated with anti-adhesive coating in P.T.F.E. for easy cleaning.

Features

- Body in nickel-plated die-cast zamak
- Universal basket in die-cast zamak
- Ground stainless steel needle
- Ergonomic plastic handgrip anti-solvent
- Adjustable seal gasket in P.T.F.E
- Gun equipped with 1 No: plastic tube extension:length 200mm
- Extruding rod in aluminium with length of 165mm
- Rigid and robust construction suitable to any kind of heavy jobs
- Basket's ball in stainless steel

PU Foam Gun I.S.165 Model

A professional metal foam gun for Dow INSTA-STIK 750ml Roofing Adhesive and foaming adhesives pressurised in cylinders equipped with threaded ring nut. The I.S.165 is characterised by its light weight whilst still maintaining quality at a reasonable price. The gun is equipped with 1 No: plastic tube extension to reach difficult parts. Thanks to the back screw to adjust the product's flow, the gun is able to control speed and bead size accurately thereby ensuring safe clean and accurate application. The gun is hermetically sealed, so that the product inside the gun will not harden during the work's break and during normal use.
