

Dry fix verge system for profiled roof tiles

A robust, attractive and weather resistant verge system alternative to wet mortar bedding.

Dry fix verge right hand piece

Dry fix verge left hand piece

Dry fix verge end grain batten bracket (optional)

Dry fix verge eaves closer pack (right and left units)

Dry fix verge round ridge/apex piece

Dry fix verge angled ridge/apex piece

Use

- Large format, interlocking concrete and clay profiled tiles
- Batten gauges between 260-345mm
- Most pitched roof types from 15-55°
- Verges with or without bargeboards
- New build and refurbishment projects

Features and benefits

- Long lasting, reliable and virtually maintenance free
- Protects against wind uplift, water ingress and general deterioration
- Easy, fast, clean and generally safer mortar free installation
- Allows virtually all weather installation
- Extended slotted fixing locator flexibility
- Simple and quick '1st piece' eaves closer installation
- Strong but supple for easy flexing and sliding along the tiles
- Secure fit around the tile reassurance
- Rebated eaves closer design allows for guttering when required
- Maintains consistently smart appearance
- Not impacted by building settlement
- Helps prevent entry of large insects, birds and vermin into the roofline
- Meets mechanical fix legislation requirements

The system also offers a unique steel fixing bracket option that presents flexible fixing points for use with alternative size counter battens or straight onto tile batten ends. The bracket avoids the reliance of end grain fixing, which can cause splitting and consequential damp penetration issues.

Quality

- Helping to meet BS 5534 Code of practice for slating and tiling
- Complies with all other relevant regulations and standards
- Manufactured to BS EN ISO 9001 and BS EN ISO 14001

Installation advice

Please refer to our website www.timloc.co.uk for our full recommended installation guidance.

How to order

Select the relevant verge system colour for the project

1 verge piece is required for each roof tile in the sloping run

- Verge pieces are handed to suit left and right handed slopes

Select the ridge shape for the apex of the system - angled or round

An eaves closer must be installed at the beginning of each sloping run of dry verge

1 optional end grain batten bracket is required for each verge piece installed in the sloping run

Also available in convenient specific and complete system packs to suit your specific project's requirements
