DEKS EASY TO WORK WITH Roofing Range

Flashings for Metal Roofs

Dektite® Premium

Perfect for Flashing Pipes on Metal Roofs

The multi-application flashing in a highly durable EPDM or silicone, edged with a flexible aluminium band, flashes hot or cold flues and pipes on metal roofs. The square base fits any prepared hole on most roof profiles.

Dektite® for small penetrations

Dektite® Diverter

For Hi/Low Roof Pitches

No ponding or damming! The large base of the Dektite® Diverter dramatically reduces and diverts rain water back up that can occur on very low or high pitched roofs and deep ribbed roofing profiles. No need to cut around pipes, just quick straight line for the square base.

Dektite® Retrofit™ Diverter & RFS4

Flashings for Metal Roofs

Ideal for flashing square ducts and chimneys

Dekstrip® Flashing

Stretches to any shape, Seals and Stays

The unique and patented internal aluminium strip allows the forming of almost any shape to seal and waterproof. Use with butyl mastic sealant and self-drilling screws to seal pipes, ducts, skylights, chimneys, bullnose and curved roofing profiles.

Great for large round pipes

Excellent for curved profiles

Dektite® Fixing Kits

Dektite® fixing kits are designed for use with DEKS EPDM and Silicone flashings on metal roofs. The FX901 kit (As shown) contains 1 x 75ml tube of low modulus Silicone, 25 x self-drilling screws, 25 x colour caps (silver) 1 x fixing instruction leaflet.

The FX902 kit contains 3×75 ml tube of low modulus silicone, 75×8 self-drilling screws, 75×8 colour caps (silver) and 1×8 fixing instruction leaflet.

On the back page of the instruction leaflet is a table which indicates which kit is required for each size of flashing.

Flashing Adhesive

Our flashing adhesive is a one part Polymer hybrid engineering grade adhesive with primerless adhesion to most substrates and is formulated to adhere Dektite® EPDM & Silicone flashings. The adhesive reacts to atmospheric moisture to produce a long life polymer hybrid rubber joint that is resistant to UV and will remain permanently flexible.

Temperature range: -50°C to +165°C

Flashings for Flat Membrane and Bitumen Roofs

FlatSeal™

Ideal for Flat and Low pitch Roofs with Single Ply or Bitumen Coverings

No special tools or fittings are needed - FlatSeal™ EPDM snaps tight to pipe without clips. Seals to roof with hot or cold liquid bitumen - refer to our website for installation guide. Black EPDM for maximum UV and Ozone resistance.

FlatSeal™ Butyl

Ideal for Flat and Low pitch Roofs with Single Ply or Bitumen Coverings

No special tools or fittings are needed - FlatSeal™ snaps tight to pipe without clips. Seals with self adhesive butyl base - refer to our website for installation guide.

Flashings for Tile and Slate Roofs

Seldek® Aluminium

Installs in a flash on Tile or Slate Roofs

The Seldek® Aluminium won't stain or corrode roofs and gutters. The EPDM cone, which is trimmed on site to fit, is ingeniously locked to a high grade and malleable aluminium base. The fast economical way to flash a tile roof.

				Code
Pipe External	Roof Pitch	Base Size	Base Type	Black EPDM
12 - 70mm	0-45°	500 x 600mm	Aluminium	SDA100B

Seldek® Nu-Lead®

No more concern about Unprotected Lead

Seldek® Nu-Lead® has been developed for use where the handling of lead and associated environmental issues are of concern. Combines a long-life, weather-resistant EPDM cone with a grey primed acrylic coated lead base. The unique thermo-baked coating does not affect the lead's malleability, and prevents leaching onto the roof and into gutters, downpipes and the water table.

				Code

175 - 330mm	0-45°	850 x 550mm	Nu-Lead	DNL108B

Flashings for Boiler Flues

Fully water proofs boiler flues
Durable, high quality polymer cone ensures a
secure fit to the outer surface of both twin and
single wall systems. These 2 items will fit all boiler
brands where a roof exit is required. Available in a
Aluminum or Lead base with an EPDM cone.

A size to suit every application Comes with a large range - Cover any boiler flue application with just one product!

Safe to use

Handle either of these great products without safety concerns.

Won't stain roofs or guttering No discolouration of flues or slates.

Environmentally Friendly No leaching of contaminated water into our waterways.

Can be painted to match the roof colour Use a good acrylic paint (apply a polyester etched primer first on SELDEK® Aluminium™)

50 - 170mm	0-45°	500 x 600mm	Aluminium	SDA101B
50 - 170mm	0-45°	600 x 600mm	Nu-Lead	DNL103B

Air Seal Sleeve - for passive homes

Deks Air Seal Sleeve is used to create an airtight seal around roof penetrations between 150mm and 280mm in diameter.

This seal comprises of butyl backing and the classic Deks EPDM flashing ensuring a secure, easy and effective fit. Ideal for installation in passive houses or when trying to reduce heat loss.

For a fast and effective sealing of penetrations through vapour barriers

The EPDM sleeve can be cut to accommodate any pipe size from 150mm to 280mm

Perfect for use with twin-wall chimney systems

The self adhesive butyl backing will adhere to most substrates

Will accommodate roof pitches from 0 to 45 degrees

				Code

150 - 280mm	0-45°	595 x 500mm	Butyl	DAB107B

Solar Flashings for Tile and Slate Roofs

SolarDek™

The speciality Flashing for solar thermal installations

The purpose designed SolarDekTM provides the safest, most efficient method of flashing solar thermal pipes and cables on tile and slate roofs.

SolarDek[™] features the Nu-Lead[®] base which will not stain or corrode the roof, together with long-life Dektite[®] EPDM or grey silicone cone ideally suited to solar thermal pipe sizes.

SolarDek™

Grey high temperature seal

Complete weather proofing for all solar thermal pipes and cables

Safe protected Nu-Lead® apron

Purpose made durable solution as required by MCS

Solar Flashings for Metal Roofs

Dektite® Premium

Perfect for Flashing Pipes and Cables on Metal Roofs

The multi-application flashing in a highly durable EPDM or silicone, edged with a flexible aluminium band, flashes pipes and cables on metal roofs. The square base fits most roof profiles.

Dektite® Premium Multicable DFE 101BM

Protects up to 12 cables and weatherproofs entry to any metal roof

Purpose made durable solution as required by MCS

Suits most roof profiles

Dektite® Premium DFE 101/201

Versatile flashing, accommodates up to 5 penetrations

Suitable for pipes and/or cables

High UV resistance

Dektite® Premium DFE 100/200

For solar pipe or up to 3 cables

Suits most roof profiles

Available in black and grey EPDM or red silicone

Perform® Flexible Covering

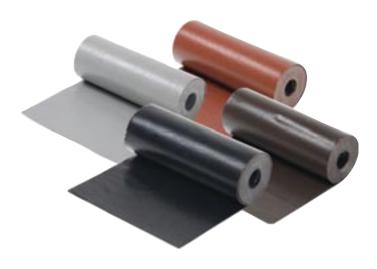

Perform® Flexible Covering

The perfect replacement for lead

Perform® is a composite consisting of aluminium mesh, embedded in a special type of polymer rubber. Both of these materials are environmentally sound and UV resistant. The material offers the same functionality of lead, has excellent stretching properties and provides a 'breathable' covering which prevents the formation of condensation.

Much lighter than lead and non-toxic, Perform® meets all the demands of today's health and safety regulations.

In order to match various different coloured tiles or slates, specifiers can now choose from four different colours; grey and black are available from stock with terracotta and brown to special order.

No scrap value to potential thieves

Lightweight and easy to handle

Great form stability, easily cut and dressed

Available in 4 colours

Use full roll without need for expansion joints

Perfect for flashing all types of structures including car ports, conservatories and extensions.

Ideal solution for flashing dormer windows and any other penetrations through traditional roofs.

Great for flashing around traditional chimney stacks on any type of profiled tile or slate roof.

Ideal for valley or box gutters.

Ideal solution for flashing solar panel fixings and around roof lights.

Perform® adhesive works on wet surfaces

Fast Flash - Self-adhesive Flashing

Fast Flash

Self Adhesive and user friendly lead replacement material

Fast Flash is ideal for any application requiring a quick and secure flashing solution.

Fast Flash can be installed on roofs with a slope of min 5° and on almost all roof materials. Fast Flash is environmentally friendly and easy to install as the reverse is self-adhesive, as well as being flexible and very workable.

If painting is required or where water is likely to travel from copper or bitumen onto Fast Flash use 100% acrylic low sheen exterior paint.

Easy to Install

Light weight, easy to trim and fully self-adhesive

Slower set Adhesive Allows time for repositioning

Flexible and very workable

Malleable and stretchable. Dresses well to all profiles

Product Range

Rolls in three standard sizes, and colours Black, Grey, Brick Red* and Anthracite Grey. (Grey colour matches old/worn lead. Anthracite grey matches new lead).

Environmentally Friendly

Aluminium stretch netting cast in polymer rubber

Flash Seal™

Effective sealing

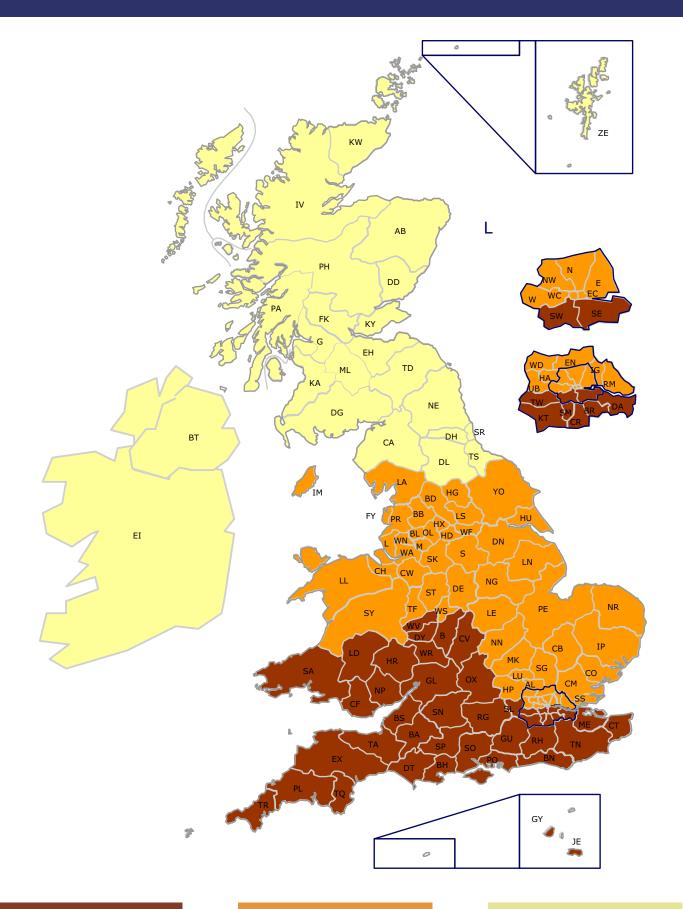

FlashSeal is used for the sealing, protection and repair of flashing on roofs and is among other things, well-suited for the treatment of bitumen-based products. FlashSeal can cover tears up to 5mm wide, applied in a layer thickness of 1.5mm and is waterproof after hardening.

- Sealing, protection and repair of flashing on roofs
- Suitable for the treatment of bitumen-based products
- Can cover tears up to 5mm wide
- Waterproof after hardening
- Contains: 1.13kg
- Works on wet surfaces
- Great emergency roof/gutter fix
