Kytun Slate Dry Verge Product Benefits

✓ **Quick & Easy to Install**
Fixing through Aluminium into batten.

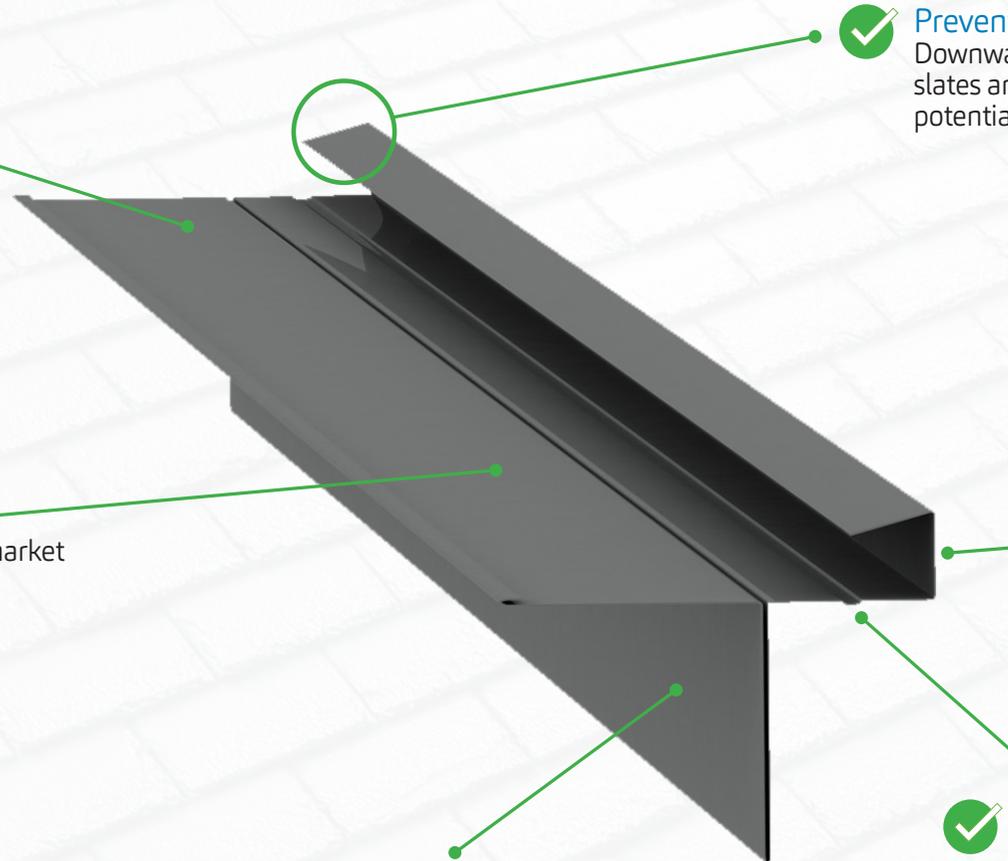

✓ **Prevents wind uplift**
Downward slope secures slates and eliminates potential for wind uplift.

✓ **Over Batten Fix**
The only product on market with an OBF.

✓ **Edge for roofer**
Once fixed the C02/C02P provides a guide straight edge for the roofer which saves & labour costs.

✓ **Total End Batten Protection**
Protecting batten ends ensures longer lasting roof.

✓ **Drip System**
All water entering our product channels into the gutter and eaves through our drip system.

UNIVERSAL Dry Ridge Kit Product Benefits

SUITABLE FOR USE WITH:

Material & Physical Properties

LDPE - Product is rubberised making it more flexible, less brittle and has higher flexural strength.

Ventilation

Water channels on KYTUN Bracket allow Ventilation at the roof ridge.

Angle Capacity

Flexible nature of KYTUN bracket gives a tight fix to Ridge tile including, steep plain angle ridges.

Water run off – Drainage

Drainage channels to ensure water does not enter roof space. Water directed onto roof covering.

Fixing

Due to its innovative design the KYTUN Bracket fits tight to the Ridge Capping (Half round or angled) when screw is fixed.

Capping Piece

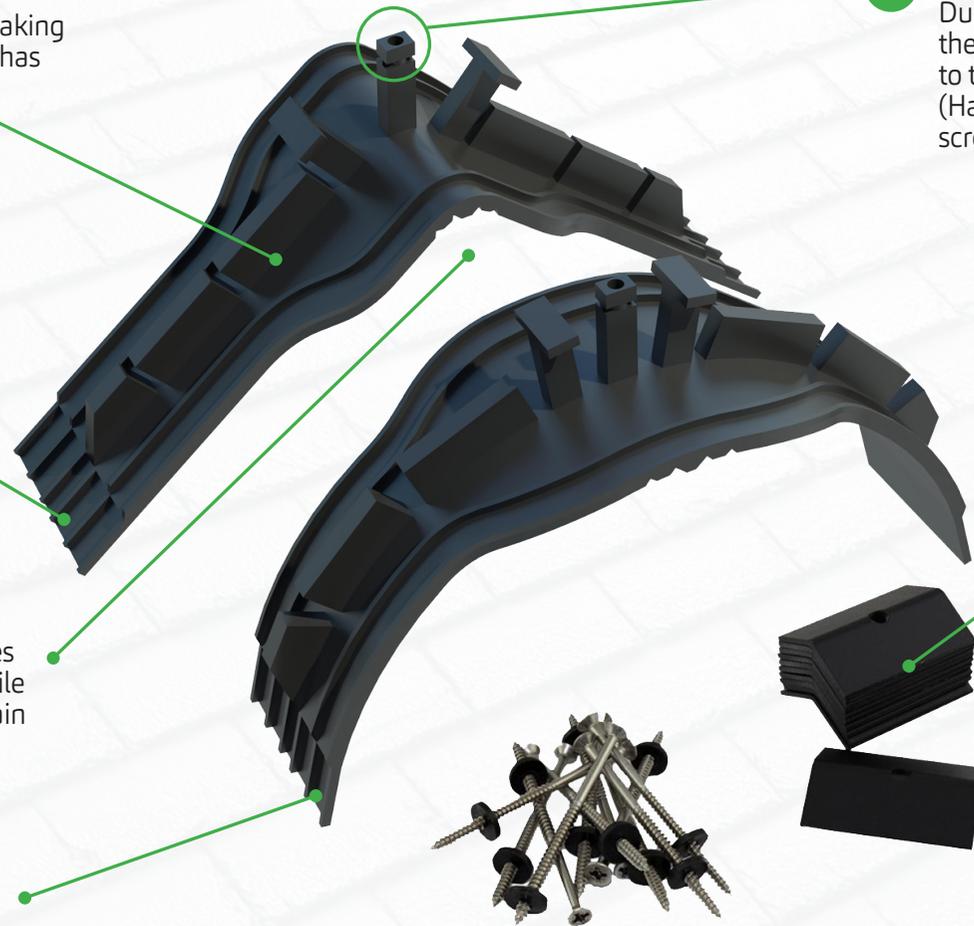

Aluminium capping piece 2mm thick.

100%
Guaranteed
Not to crack or break.

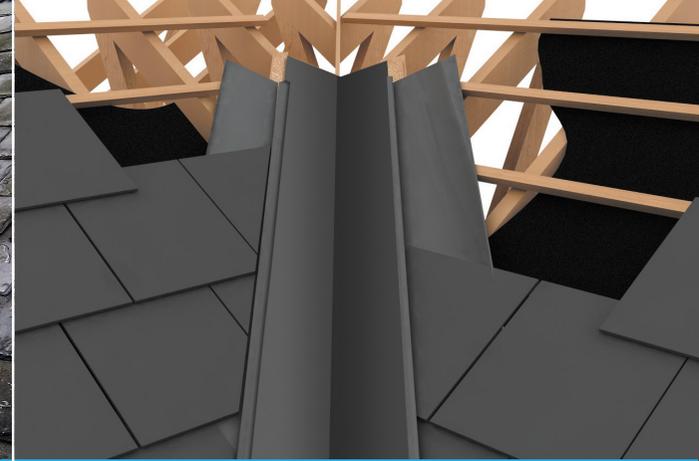

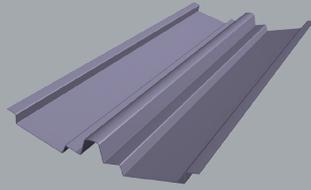

Pre-installation

KYTUN Ridge Bracket can be pre-installed to Ridge Tiles due to its innovative design to allow for faster installation of your ridge.
