

Continuous Soffit Ventilator

CODE **G800**

Description:

The G800 Continuous Soffit Ventilator is designed to provide a solution to roof ventilation where a traditional soffit board is specified.

The airflow passage consists of evenly spaced slots specifically sized to prohibit large insects gaining access but wide enough not to be blocked by debris, paint or water droplets (See BS5250 section 6).

Fitting Instructions:

The G800 Soffit Ventilator (A) should be securely screwed to the soffit board through the fixing holes provided as shown.

The soffit board (4mm – 12mm) should be pushed into the adjustable mouth of the soffit strip and fixed to the brick course as normal. Use in conjunction with other products from the Manthorpe range to provide a complete roof ventilation system.
