

Roll Panel Ventilator
CODE G500
Description

The G500 Roll Panel Vent is designed to maintain an air gap between the underside of the roofing membrane or sarking board and loft insulation at the eaves, providing a continuous flow of air into the roof space.

The castellated profile is suitable for either 400mm, 450mm, or 600mm rafter centres, ideal for both new build and refurbishment where rafter centres are not consistent or unknown. A double width version is also available when extra coverage is required in low pitch and deep insulation details.

Product Specifications

Colour	Black
Material	PET (Polyethylene terephthalate)
Part Weight	1.0 kg
Packing Details	12 metres 2 x 6 metre rolls per box
Free Airflow	25,000mm ² equivalent to a continuous gap of 25mm

Roll Panel Ventilator

CODE **G500**

Fitting

The G500 Roll Panel Ventilator (A) should be rolled out over the full length of the eaves and adjusted to align with the required roof truss centres then nailed or stapled to secure in position as shown.

This product should be used in conjunction with other products from the Manthorpe range to provide a complete roof ventilation system.
