

## CON6+ VENTILATED DRY FIX RIDGE AND HIP SYSTEM

### Description

CON6+ is a universal ventilated dry fix ridge and hip system that can be used with all the commonly available ridge and hip tile types. CON6+ can be fitted to all roof pitches\* with no special tools required. The single unique universal jointing gasket adds flexibility and allows compatibility with the most commonly available ridge and hip tile profiles, including baby ridges. Product code: **HD CON6**

Optional GRP hip tile support trays (code HT165 and HT300) are also available to aid the location and alignment of hip tiles.

### BS 8612:2018 Dry Fixed Ridge, Hip and Verges Systems for Slating and Tiling - Specification
