

Interlocking Dry Verge Systems

Danelaw® offer more Dry Verge products than any other manufacturer. Our innovative systems are cost-effective and time saving. They eliminate the need for mortar while providing protection from wind uplift and driving rain to the perimeter of the roof.

Thin Leading Edge Dry Verge

HD TIDV

Compatible with thin leading edge types between 260 & 355mm batten gauges.

System components include:

- HD TIDV Dry Verge Unit (Handed)
- HD IDV/HR Half round ridge cap
