

DEK DRAIN A15

DEK DRAIN A15

CHANNEL DRAINAGE THAT MAKES SENSE

A Brand New Design In Our Plastic Channel Drainage

DekDrain A15 Plastic Channel Drainage features a new engineered design in channel drain. Due to its linear bar grating design, water flow is disrupted and protects against traversing water, unlike traditional gratings. Measuring 78mm in depth, its perfect for your paving projects. Also featuring the new push fit, clip in bottom outlet which makes for simple, quick, user-friendly assembly. Each channel measures 1000mm, with a cutting point at 500mm for applications that require a shorter length. Connect to 110mm plastic pipe with an outlet junction located at either end of the channel for ease of use. DekDrain A15 is a channel drainage that makes sense!

Certified to BS EN 1433, DekDrain is a high quality, yet cost effective solution for stylish surface drainage. Also available in traditional slotted galvanised.
