Good Afternoon,

As of the 24th August 2023 it is a legal requirement to have passed online training for the safe use of Diisocyanates.

Anyone that uses/handles FastCoat Pro and can potentially use/handle Porous Primer Flex and Traffic Coat which contain a level of Diisocyanates which requires training, we are advising that training is carried out before purchasing these 2 products.

Please see information and what courses are needed before applying these products below.

You have until 24th August 2023 to get this in place for all applicators or people that may handle the products. Please see below for a table I have put together to help contractors figure out which level they need to sit.

Please Note: Please be reminded, this is the responsibility of the customer to ensure that the relevant training certificate is held. Records of the should be maintained to confirm the training in case of an inspection that you/your staff have been trained. Training should be renewed at least every 5 years.

<https://isopa-aisbl.idloom.events/>

The new REACH restriction requires that workers handling products that contain diisocyanates to complete training depending on their uses. The regulation defines 3 level of trainings, General Training (Level I), Intermediate Training (Level II) and Advanced Training (Level III).

Company Reg: 06963012

All Level II and Level III trainings include as a prerequisite the General Training.

Level	Who needs to sit this course	Module Number
1	Everyone who may handle Polyurethane Products	045 - General Training 045 General Training - European Diisocyanates and Polyols Producers Association (ISOPA) (idloom.events)
1+2	Those who apply polyurethane products by brush or roller, use open mixtures, clean or discard waste	005 https://isopa-aisbl.idloom.events/
1+2+3	Those who are spraying polyurethane products outside a ventilated booth, use open mixtures, clean or discard waste	011 https://isopa-aisbl.idloom.events/

Please let me know if you need anything else regarding the above.

LRS continue to develop products and hope to bring you some news in the near future with a Porous Primer Flex and Traffic Coat alternatives that do not require training for handling.
