## Slate Dry Verge Trim uPVC (T2)

Our Kytun Slate Dry Verge Systems create a seamless and clean verge detail which aesthetically enhances the finish to gable ends on your roofing project.

The Kytun Slate Dry Verge System secures the slates on your roof at the verge. This weathertight system ensures there is no water penetration, with all rainwater directed to the eaves gutter which provides a high level of protection for your roof. As well as being weatherproof, strong and durable, our slate dry verge system is maintenance free.

### Features & Benefits

- Integrated vertical leg provides full wind uplift and rain protection along the verge and to the batten ends
- Independently tested to BS 8612 by BRE
- Drains directly into eaves gutter
- Will not discharge water on to gable end wall
- Requires no maintenance once installed
- Quick & easy to install, saving labour costs
- Creates continuous clean verge appearance
- UV stabilised for long life and colour stability
- Internal & External jointers available separately

### Technical Details

<b>Product Code</b>	C02P/C02NP / C02LP
<b>Length</b>	3m
<b>Colour</b>	Black
<b>Material</b>	uPVC
<b>Pack Qty</b>	8
<b>Pack Weight</b>	11Kg
