

Aluminium

Performance Plus Slate Dry Valley Trim 3m

The Kytun Performance Plus Slate Dry Valley Trim is specifically for use in conjunction with our Kytun Aluminium Dry Valley Trough. Due to the high volume of water travelling down to the valley, the design of Slate Trim actively slows the flow of water from the roof slope and discharges it in a controlled manner into the valley trough via a series of outlets running along the length of the trim.

Kytun Slate Dry Valley Trim secures slates along the edge of the valley, eliminating the problems traditionally encountered with small slate pieces falling out.

Features & Benefits

- Manufactured from high grade PPC Aluminium
- Compatible with both man-made and natural double lap slates.
- Environmentally friendly material - 100% fully recyclable
- Provides full wind uplift and rain protection.
- Quick and easy to install.
- Requires no maintenance once installed.
- Clean aesthetic lines with a sharp finish
- 30yr aluminium durability warranty and 20yr colour warranty

Technical Details

Product Code	C07 / C07N
Material	Polyester Coated Aluminium
Length	3m
Sizes	18mm / 25mm
Pack Qty	10
Pack Weight	11.7Kg

Colour options

Blue/Black Black

Quality Standards & Certification
