

## Aluminium

# Performance **PLUS<sup>+</sup>** Tile Dry Verge Trim (T2)

The Kytun Performance Plus Tile Dry Verge System (T2) can be used with all flat interlocking tiles and plain tiles. This system permanently secures tile applications on gable ends protecting the verge from wind uplift and rain. Manufactured using high grade pre-primed polyester coated aluminium.

Our Kytun Performance Plus Tile Dry Verge System (T2) helps to create a seamless and clean dry verge detail and an aesthetically pleasing finish to gable ends on your next roofing project. This weathertight system ensures water cannot penetrate, providing an enhanced level of protection for all your roofs. The unique design can replace one of the 2 mechanical fixings of the tiles along the verge by securing them in place in accordance with BS5534. As well as being weatherproof, strong and durable, the Performance Plus Tile Dry Verge System (T2) is also maintenance-free.

## Features & Benefits

- Permanently secures tiles along the verge edge
- Provides full driving rain protection as demonstrated by independent BRE testing.
- Integrated 'drain channel' which allows for self drainage of rain water into the eaves gutter.
- Extremely easy and quick to install.
- Requires no maintenance once installed.
- Can be fully customised.
- Extensive range of colours available.
- Internal jointer available
- 30yr aluminium durability warranty and 20yr colour warranty

## Technical Details

<b>Product Code</b>	C08TS / C08T / C08TL
<b>Colour</b>	Blue/Black, Black, Brown
<b>Material</b>	Polyester Coated Aluminium
<b>Pack Qty</b>	4
<b>Pack Weight</b>	6Kg
