

Uni-Fix Pro Dry Ridge Kit 6m Copper

The Kytun Uni-Fix Copper Dry Ridge Kit - 6m is the first truly universal system suitable for ventilating and mechanically fixing ridge tiles.

The unique Uni-Fix Ridge Union Bracket design allows for easy fixing to all concrete and clay ridge tiles. Suitable for 15° - 60° roof pitches. This ridge kit can be used with Universal Angle Ridges, Half Round and Plain Angled Ridge Tiles.

The central flat spine of the roll is reinforced for fixing to the ridge batten. The two corrugated side flaps are designed to drape down over the top row of tiles on either side as the roll is opened out. The lower corrugated portion of each flap is finished with copper which will help inhibit the growth of moss and lichens on the roof slope.

Features & Benefits

- Complete kit - covers 6m of ridge
- Compatible with most ridge / roof tile profiles and slates
- Copper trims inhibit moss & lichen growth on the new roof
- Breathable product, provides >5,000mm²/m ventilation
- Integrated butyl adhesive prevents wind driven rain ingress
- Rubberised ridge union bracket follows the underside of the ridge tile for maximum rain protection.
- Provides permanent, secure fixing of ridge / hip tiles.
- Independently tested by BRE to BS 8612.

Technical Details

Product Code	DRUC02
Length	6m
Pack Contains	6m Ventilated ridge roll - Copper 13no. Dry ridge union brackets 13no. Stainless steel screws 13no. Clamping plates 10no. Galvanised ridge batten straps
Pack Weight	2.7Kg
Pallet Qty	78 boxes
