

Limestone Coping Stones Data Sheet

Limestone Coping Stone – 25 mm Thickness

Product Description

Indian Limestone Coping Stones are designed to provide a durable, attractive finishing detail to walls, parapets, and boundary features. Manufactured from high-quality Indian Limestone, these coping stones combine strength, weather resistance, and timeless aesthetic appeal.

Material

- **Stone Type :** Limestone
 - **Origin:** India
 - **Geological Type:** Sedimentary stone
-

Dimensions

- **Thickness:** 25 mm
 - **Lengths:** 600mm
 - **Widths:** 150mm & 300mm
 - **Tolerances:** ± 3 mm (natural stone)
-

Edge & Profile Options

- Pencil Bullnose along both 600mm edges
 - Drip channels underside along both 600mm lengths
-

Surface Finish

- Natural limestone
 - Sawn underside
-

Colour Range

- Natural multi-tonal variations
- Colours include:
 - Cuddapah Black
 - Tandoor Yellow
 - Kota Blue

Note: Colour and veining may vary due to the natural characteristics of sandstone.

Technical Characteristics (Typical Values)

- **Compressive Strength: 20–40 MPa**
 - **Water Absorption: 2–6%**
 - **Density: Approx. 2,200–2,400 kg/m³**
 - **Frost Resistance: Yes – must be installed as per manufacturers guidelines**
-

Applications

- Garden and boundary walls
 - Parapet walls
 - Retaining walls
 - Decorative landscape features
 - Residential and light commercial projects
-

Installation Guidelines

- Install on a solid, level bed using a suitable exterior-grade mortar
 - Allow for expansion joints where required
 - A slight fall to aid water run off is recommended
 - We recommend sealing after installation to improve longevity.
-

Maintenance

- Low maintenance
- Clean periodically with hot soapy water and a mild stone-safe cleaner

- Avoid acidic or aggressive cleaning products
 - Re-sealing recommended every 2–3 years (depending on exposure)
-

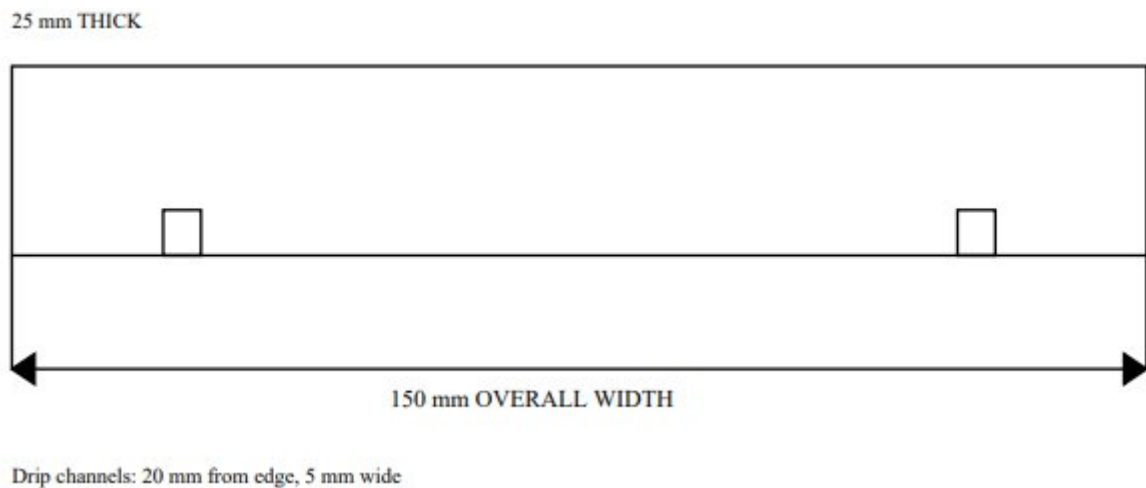

Sustainability

- Natural stone with long service life
 - Ethically sourced from approved Indian quarries
 - Fully recyclable material
-

Packaging

- Supplied on wooden pallets
 - Protective plastic wrapping
 - Quantity per pallet varies by size
-

Disclaimer

Please note that our sandstone and limestone coping stones are manufactured from natural stone. As a result, variations in colour, shade, veining, texture and surface markings are an inherent characteristic of the material.

No two stones are identical in colour, and differences between individual pieces should be expected. These natural variations are not defects but are part of the unique appearance and beauty of genuine natural stone. Images shown are for guidance only and may not represent the exact colour or finish of the product supplied.

Furthermore, the rounded edges are hand finished and due to the nature of carrying out this work on natural stone, they cannot ever be perfectly consistent in terms of shape and polish. Best efforts are made to ensure a finish that is suitable in consistency for an exterior wall.
