

Energy-Saving Membranes

Powerlon® Vapour Control Layers and Air Barriers prevent moisture from reaching the insulation layer and significantly improve the building's air tightness and increase energy efficiency.

- Suitable for roof, walls and floor installations
- Reinforced for high tensile strength
- Choice of grades
- Air barrier to control ventilation
- Controls vapour to minimise condensation
- Fully illustrated installation instructions

POWERLON ULTRABLOCK

Reinforced thermo-reflective foil laminate.

Suitable for high humidity.

Roofs ✓ Walls ✓ Floors ✓

UltraBlock 300 (270 gsm)

Water vapour resistance **BEST**

UltraBlock 200 (104 gsm)

Water vapour resistance **BETTER**

UltraBlock 150 (100 gsm)

Water vapour resistance **GOOD**

POWERLON VCL

Reinforced vapour control layer with high tensile strength.

Roofs ✓ Walls ✓ Floors ✓

VCL 250 (285 gsm)

Water vapour resistance **BEST**

VCL 170 (210 gsm)

Water vapour resistance **BETTER**

VCL 150 (180 gsm)

Water vapour resistance **GOOD**

VARIPERM (200 gsm)

Water vapour resistance **REACTIVE**

POWERLON AIR BARRIER

Air ventilation and moisture control layer.

Roofs ✓ Walls ✓ Floors ✓

AIR BARRIER (112 gsm)

Water vapour resistance **GOOD**
