

## PREMIUM PVC WOODGRAIN EFFECT Decking Board 3.6m

Cladco PVC-ASA co-extrusion technology is a new generation of Premium PVC Decking. Wood free but still gives a natural woodgrain effect without the concerns of fading, staining or scratching and comes with a 20-year structural guarantee.

PVC Decking has a dense PVC core which is encased in ASA (acrylic-styrene-acrylonitrile), the most weather-resistant resin currently available on the market, providing superior strength and resilience.

PVC Decking is the superior synthetic Decking material of choice and competitively priced on the market. Unlike most traditional Decking solutions, it provides a luxury embossed finish, colour and texture. Cladco PVC Decking is available in six colours.

### Advantages of PVC Decking

Cladco PVC Decking Boards feature a highly weather-resistant resin shell, which is a material commonly used by premium vehicle manufacturers for car parts. This is due to its resilience and toughness properties, providing resistance to moisture, mould, harmful UV rays and rot.

Cladco PVC Decking can be installed low to the ground and in damp areas due to the PVC-ASA moisture-resistant properties. This high-quality material means PVC Decking is suitable for building a decked area that is low to the ground or where it will come into contact with moisture such as around pools, under, or near a hot tub.

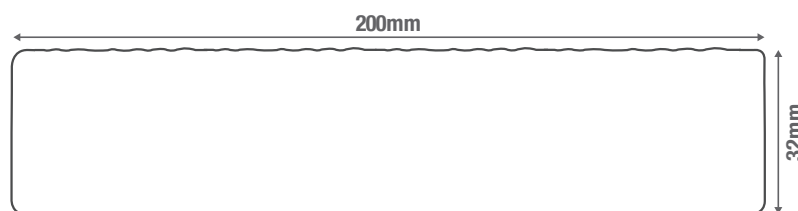

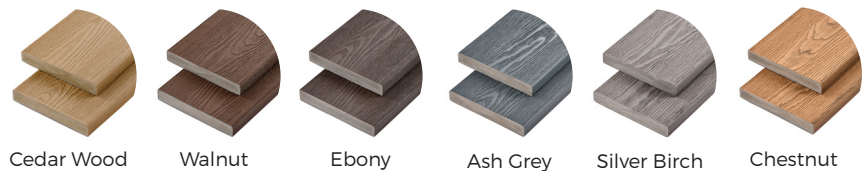

Cladco PVC Decking is incredibly strong and will not easily scratch or stain. PVC Boards are tough against everyday wear and tear and because the material is non-porous, stains can be wiped off with little effort.

Due to the advanced nature of the PVC Decking composition, it looks more like natural wood than any other synthetic Decking materials available.

PVC Decking is low-maintenance; simply wash it with soap and water regularly, and an occasional pressure wash will help the deck continue looking great for years. Compatible with traditional and hidden fastening methods.

SPECIFICATIONS	
Board Length	3.6 metres
Board Width	200mm
Board Thickness	32mm
Each Board weighs approximately	14.53kg
